Napco Gemini Security Systems Now Crestron Certified Integrated™

AMITYVILLE, N.Y., October 2015, NAPCO Security Systems is proud to announce it is now a Crestron Certified Integrated Partner™ and its Gemini Alarm Panels provide integration within Crestron's Control and Automation Systems. It will provide live demonstrations at the CEDIA Show, **at Napco's iBridge Connected Home Booth #6421, in Dallas' Kay Bailey Hutchinson Convention Center, next week, Oct 14-17, 2015.**

For Crestron integration, a single easy to use module is used to control any Napco Gemini Security system, from 8 to 255 zones, via TCP/IP. The Crestron Module offers Gemini Keypad control and system status feedback to the Crestron System seamlessly. Additionally, new Crestron Pyng™ luxury home integration is also coming soon.

Jorge Hevia, SVP Sales & Marketing for Napco Security Technologies, Inc. said in response, "we are pleased to offer new home and business automation integration to the many security professionals looking to add a leading-edge security solution integrated within a smart automation platform."

Napco provides system integration with its Napco Gemini Security Systems, with several top automation system leaders, now including Crestron® and Control4® certifications, in support of this market need and their large bases of custom electronic integration professionals.

For more information or security training contact Napco Security Technologies, Inc. at 1.800.645.9445, 631.842.9400 or salesinfo@napcosecurity.com
